

CFPL Pultruse For Carbon fiber

Main Program Parameter

Maximum pultrusion force: 10tons,20tons,30tons

Maximum clamping force: 10tons,20tons,30tons

Pultrusion speed range:0.1-0.6m/min

Number of mold heating zones: 3zones or 6zones,the temperature can be set separately

Mold heating temperature range: 0-200℃

Maximum input power of equipment: 30KW

Heating maximum output power: 15KW

Power requirements: three-phase five wire(380V/50HZ)

2. Machine size:
